

INBOUND INSPECTION LANE RULES

All Drivers must adhere to the following safety rules while in the inspection lane:

- Speed in the gate is 5MPH maximum. Yard speed limit is 5 miles per hour.

ALL GATE AND INSPECTION AREAS ARE SAFETY ZONES DUE TO THE TRAFFIC AROUND IT AND WITH PEOPLE OUT OF TRUCKS WORKING.

- **High Visibility Clothing is required by all drivers, while working inside of PCR gates or yard areas.**
- There are 2 inbound inspection lanes closest to the office – Once you pick a lane, **do not back up and switch lanes. Maximum 2 trucks per lane.**
- Once you have stopped in the inspection area you must **set your brakes shut your engine down then get out of your truck. Accompany the gate inspector throughout the inspection. Do not move your vehicle until instructed by the gate inspector.**
- **Inform your inspector of any equipment issues.** The interchange process is an important part of documenting defects and also helps in getting the repairs done.
- Unlock all twist locks and open the container door, when applicable, for inspection.
- Once you receive your inspection slip, and your truck is first in line, proceed to the office.
- Be prepared with all needed information to pick up or drop off equipment. You must know what you're needing. And be able to communicate it.

The most important safety feature in any truck is the professional driver!!
